LOCATIONS of FIELDS &c.

in

Johnson's Survey of 1799

and

Buttle's Survey of 1812

INTRODUCTION

In the CPLHS Archives, there are transcriptions of two surveys made shortly after the passing of the Cartmel Enclosure Act of 1796. Those surveys, by Johnson in 1799 and Buttle in 1812, give details of the owners, occupiers and various other details of numbered fields and properties in the areas which they cover, but they do not mention the location of any of the properties.

The main purpose of this document is to provide schedules of the approximate locations of the fields and properties listed in those transcribed surveys, without to need to reproduce the whole of those lengthy transcripts.

Also included are some notes on how the fields and properties were numbered, and why some numbers are duplicated in some townships in Buttle's survey.

BACKGROUND to the FIELD NUMBERING

Stockdale's Annals of Cartmel, pages 330 & 331, gives the following account of the appointment of surveyors by the Commissioners appointed by the Enclosure Act.

"On the same day [31st July 1796] the Commissioners appointed **Jno. Gibson** to survey and measure all that part of the parish which lies on the **South and South-east** side of the highway leading frome Carke to Cartmel Church Town, and from thence by Fell Gate down Cart Lane to Kent or Lancaster Sands. [herein after referred to as **Area 1**]

"Joseph Young was appointed by them to survey and measure all that part of the pariah which lies on the West side of the highway leading from Carke, by Cartmel Church Town, Broughton Chapel, and Fiddler Hall, to Newby Bridge. [herein after referred to as Area 2]

"Wm. Johnson was appointed to survey and measure all that part of the said pariah which lies on the North and East side of the highway leading from Kent or Lancaster Sands, through Cart Lane, by Fell Gate, Cartmel Church Town, Broughton Chapel, Fiddler Hall, Ayside and Newton, down Tautup to Witherslack. [herein after referred to as Area 3].

"And they appointed **Thos. Ingilby** to survey and measure all that part of the said parish which lies on the **North** side of the highway leading from Witherslack up Tautup, by Newton, Ayside, and Fiddler Hall, to Newby Bridge. [herein after referred to as **Area 4**]".

The most significant feature of this division of the parish is that it completely ignores township boundaries. The difference between the survey area boundaries and the township boundaries is illustrated on the map between these notes and the schedules. The list below summarises each area by township.

- Area 1 Principally most of Lower Allithwaite & Lower Holker
- Area 2 Principally Upper Holker, + parts of Lower Holker, Lower Allithwaite, Broughton East and Staveley
- Area 3 Principally most of Broughton East, + parts of Lower Allithwaite, Upper Allithwaite and Staveley
- Area 4 Principally Cartmel Fell, + parts of Upper Allithwaite & Staveley

When the townships are summarised by area as below, it is clear that most townships will have fields numbered by more than one surveyor, and hence the duplicate numbers in townships noted in Buttle's survey.

Townships	Sur	vey	Ar	eas	
Lower Holker	1	2			
Upper Holker		2			
Lower Allithwaite	1	2	3		
Upper Allithwaite			3	4	
Broughton East		2	3		
Staveley		2	3	4	
Cartmel Fell				4	

SURVEYS and MAPS

There is no doubt that as a result of the surveys commissioned by the Enclosure Commissioners, each of the four surveyors would have produced a map and an accompanying schedule. At present, none of those original four maps has been found in any archives, and only Johnson's schedule for area 3 has been found and transcribed.

However, soon after the four original maps were produced, they seem to have been consolidated into a single map of the whole parish, which is now in Cumbria Archives (Kendal) with the reference WPR 89/3/2/23. This map measures about 51" x32", and a digital copy of it has been donated to the CPLHS Archives. It is from that map that the attached schedules of approximate locations has been obtained.

NOTES ON THE ATTACHED SCHEDULES

In the attached schedules, the location notes have only been included if they have actually been seen on the map. There are two main reasons for the omissions, namely, some numbers in the map are either out of focus or otherwise illegible, and some numbers are not present on the map due to very small plots in built up areas. However, as may be noticed from the methodology used by the surveyors for numbering fields and properties in their areas, when no location for a particular number is shown in the schedules, it is likely to be in a similar district to adjacent numbers in that survey area.

The table above shows the potential for townships to have field and property numbers in more than one survey area. A study of the attached schedules shows that duplication of field and property numbers in a township actually occurs as follow.

Lower Allithwaite has duplication of numbers in areas 1 and 2 in the following ranges of numbers: 235 to 242, 261 to 312, 329 to 331, 350 & 351, and 505 to 508.

Lower Holker has duplication of numbers in areas 1 and 2 in the range of numbers from 105 to 190.

Broughton East has duplication of numbers in areas 2 and 3 in the range of numbers from 810 to 877, and 904 to 933.

Staveley has duplication of numbers in areas 2 and 4 in the range of numbers from 882 to 1017, and 1123 to 1129.

In all these cases, it is not possible to determine the location of a field or property in Buttle's survey without additional information.

Note also that the significant number of blanks in area 4 will be for Cartmel Fell, which being out of the CPLHS area of interest, is omitted from both the transcript of Buttle's survey and from this analysis of locations.
